Because life's too short to sail a slow boat

The **TRT 1200 GT** and **TRT 1200 CR** are two fast cruising catamarans. The **1200 GT** features a huge open cockpit with all accommodation in the voluminous hulls. The **1200 CR** features a streamlined bridgedeck cabin with seating for 6-8 around the dining table, as well as a navigation station.

Narrow, U-shaped underwater sections flare out dramatically above the waterline to produce a roomy but easily driven boat. The flared hulls also help to resist any tendency of the leeward hull to bury at speed, a common problem with high performance catamarans. Foam core/fiberglass/vinyl ester resin construction keeps the structure light and strong. A powerful sail plan on a rotating carbon fiber wing mast, and deep carbon fiber daggerboards, produce extraordinary performance on and off the wind. Even at speeds well over 20 knots, the twin carbon fiber rudders provide light, precise, responsive steering and excellent control.

Visibility from the steering station is excellent in both models, and clever cockpit ergonomics enable the boat to be sailed easily by two persons, or singlehanded. The high bridgedeck clearance eliminates bridgedeck slamming in rough seas. The **TRT 1200 GT** comes with either a single 30 hp or twin 15 hp outboard motors, while the **TRT 1200 CR** comes standard with twin 15 hp outboards. Both models can achieve speeds over 10 knots under power.

The interior is elegantly simple and lightweight. Four well separated sleeping cabins, two of which have queen-sized bunks, provide spacious sleeping accommodations for 4-8. There is full standing headroom in both hulls. In the GT model there is a large galley located amidships in the port hull, while in the CR version the galley is located aft and is even larger. The starboard hull contains a large fully enclosed head with wash basin and room for a shower.

Never before has such awesome performance been achieved in a cruiser-friendly production catamaran at such an affordable price. The **TRT 1200 series**-- nothing else comes close!

SPECIFICATIONS

LOA 12m (39'4")	Sail Area:
LWL 11.6m (38')	Mainsail 58m ² (615ft ²)
Beam 7.6m (24'11")	Jib 28m ² (297ft ²)
Weight (sailing trim):	Genoa #2 35m ² (371ft ²)
GT 3T (~6,700lb)	Genoa #1 46m ² (488ft ²)
CR 3.2T (~7000lb)	Spinnaker 115m ² (1219ft ²)
Mast ht. above deck 17m (55'9")	Optional:
Mast ht. above water 19m (62ft)	Roller furling jib/genoa
(shorter mast can be supplied)	Roller furling screacher (700ft ²)
Maximum draft 2.2m (7' 2")	Larger asymmetrical spinnaker
Minimum draft 0.5m (1' 6")
